PROFESSIONAL SUMMARY

Software Engineering undergraduate with practical experience in full-stack web and mobile application development. Skilled in Java, JavaScript, React.js, Node.js, HTML, CSS, MySQL, MongoDB, and Android development. Experienced in building real-world systems including AI-powered learning platforms, management systems, and interactive web applications. Passionate about modern software technologies, problem solving, and developing innovative digital solutions.

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript, Python, C++, C#, SQL
- **Frontend:** HTML5, CSS3, React.js, JavaScript
- **Backend:** Node.js, Express.js
- **Databases:** MySQL, MongoDB, SQLite
- **Mobile Development:** Android Studio, Java, XML
- **Tools & Platforms:** GitHub, VS Code, Postman, Figma
- **Concepts:** OOP, CRUD Operations, REST APIs, JWT Authentication

EDUCATION

SLIIT City University | BSc (Hons) Software Engineering | Present

ICBT Campus Colombo under Cardiff Metropolitan University | Higher Diploma in Software Engineering

- Fundamentals of Programming
- Database Design and Development
- Object Oriented Programming
- System Analysis and Design
- Web and Mobile Application Development

S. Thomas College Bandarawela | G.C.E Advanced Level – 2022

- Engineering Technology – S
- Science for Technology – S
- Geography – S

PROJECTS

A/L StudyMate – AI Powered Learning System

- Developing an AI-powered learning platform for Sri Lankan Advanced Level students. The system provides AI-generated model papers, online MCQ exams, performance tracking, and subject-based learning support using React.js, Node.js, MongoDB, Python, and Chart.js.

Hidden Count – Full Stack Web Game

- Developed a memory-based counting game where players identify hidden objects in AI-generated scenes before the timer expires. Built the backend using Node.js, Express.js, and MongoDB with JWT authentication and bcryptjs security. Integrated Gemini 2.0 Flash API to dynamically generate unique scenes and gameplay questions. Implemented 50 progressive difficulty levels, score tracking, leaderboard functionality, session-based gameplay, and a lives system using HTML5, CSS3, and Vanilla JavaScript.

Care Compass Hospitals Website

- Developed a full-featured hospital management website with separate dashboards for patients, staff, and administrators. Implemented doctor management, online appointment booking, emergency service information, and online payment functionalities using Java, HTML, CSS, JavaScript, and MySQL.

CityCycle Rentals Android Application

- Built an Android bike rental application with user authentication, rental tracking, bike reservation, and payment functionalities using Java and SQLite. Implemented role-based access control and responsive mobile UI design.

Automation System for a Bag Shop

- Developed a Java-based automation system with Manager and Cashier roles to manage products, prices, and transactions using Object-Oriented Programming concepts.

Hotel Automation System

- Created a C++ based hotel room booking system capable of calculating room charges and handling multiple room reservations efficiently.

SOFT SKILLS

Problem Solving, Teamwork, Communication, Leadership, Time Management, Adaptability
